DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6-13, 15, 17, 18, 20-22, 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Ritmiller, III, U.S. Patent # 6,032,109.

Fig. 2 of Ritmiller, III discloses a circuit comprising: system 102 can be read as a compensation system; signal out of amplifier 114 can be read as a first amplified analog signal having a weight (gain) can be read as a first parameter (see spec. col. 5, lines 30-43); signal from temperature sensor 154 of mux 138 can be read as a second signal wherein temperature can be read as a second parameter; offset correction 124 can be read as an offset adjustment calculation; gain corrections 142, 144 can be read as an adjusted gain; the compensated offset adjustment being combined with an adjusted gain to provide offset and gain correction at the inputs of analog output mux 132; amplifier 114 can be read as an analog amplifier.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ritmiller, III, U.S. Patent # 6,032,109.

Although Ritmiller, III does not mention that the analog amplifier having a gain greater than one hundred, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to design the analog amplifier to have a gain greater than one hundred since the gain is a design variable and it is well known in the art to have the gain adjusted in order to meet system requirements.

Allowable Subject Matter

Claims 4, 5, 14, 19, 23, and 25-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,910,381 B2, 6,917,203 B1, 5,848,383, and US2002/0158688 A1 contain some limitations of the claimed invention.
